Eugene,
Thank you very much for your response. C++ is not very relevant for GIS applications and will unlikely be useful for our majors.
I hope you will enjoy the rest of the break.
Andrey

Thanks, Andrey. Yes, it's been a good break. The faculty did discuss this, and I have responding to the consult on my list of things to do when I get back to the office next week. The short answer is, Has impact - no objection.

A couple of folks wanted me to ask if CS 1160 C/C++ should be listed as an option. Without CS 1130, I think that the database course is the only item in a "choose one" category.

Andrey,
Thanks for sharing the changes.
I see no impact on the Social Science Teaching program.

Dear **Chad**,

University Curriculum Committee asked Geography to send our curriculum package to your attention. The curricular changes deal with the recasting of our undergraduate BA major and minor alterations in other programs, and do not seemingly affect social science students. Still we thought it is important to make sure that you have access to our proposal, in case you have any comments or suggestions. Please, let us know if you think these changes may impact social science students.

Thank you very much,
Andrey

to me

Andrey,

As far as I know, no curriculum consultation forms have gone out to anyone (I haven't gotten any), so to make things easier, *I'll confirm that it would be appropriate to have EARTHSC 3330 and 3355 in the Geography BA.* We intend to keep offering those courses.

I believe the new curriculum system has failed to operate correctly, so I'm going to be sending out forms via email, which fortunately still works....At least no one in CHAS has been able to get anything done with the new system.

Hi Andrey-

As you can imagine, we always welcome good students to our classes so we have no objection to this. Please remember that course has pre-reqs of Econ 1041 and 1051. Thanks!

Fred

Hi Andrey,

Thank you for the elective courses.

Certainly you can include my Intro course as an elective in the geography department.

Best,
Bill

Bill,

Absolutely! My courses are GEOG 3310 Geographic Information Systems and GEOG 4310 GIS Applications.

I also wanted to email you this week to inquire whether it is OK to include TECH 1015 Introduction to Sustainability course under Electives into our revised BA in Geography program.

Thank you very much,
Andrey

Andrey,

Thank you for your email. Since I wrote you on November 28th I did receive a copy of the Geography curriculum proposals as an ex officio member of the UCC. I asked the Geography bibliographer, Gretchen Gould, to assess the impact of the proposed changes on the Library in the absence of a formal consultation request. We do not anticipate any challenges in providing appropriate resources and services.

Katherine,

I am not sure whether UCC has forwarded you a copy of our paper curriculum package. We had to submit it on paper since Leapfrog system is not operational, and it has been a bit unclear how that process should work. I attach a electronic copy for your considerations in case you have not seen it yet.
Our proposal restructures of BA and MA degrees. this restructuring is based on existing resources and will not require additional support from the Library. We propose only one new course and drop two courses.

Thank you very much for you consideration,
Andrey
